DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 and 8-19, drawn to methods of conducting a clinical trial, classified in class 702, subclass 20.
- II. Claim 5, drawn to methods of designing novel drug therapies, classified in class 702, subclass 20.
- III. Claim 6, drawn to methods of developing discrete drugs, classified in class 702, subclass 20.
- IV. Claim 7, drawn to methods of developing a drug for different patients, classified in class 702, subclass 20.

The inventions are distinct, each from the other because of the following reasons:

Each of the methods has different goals and different method steps. Note that the goal of drug design and drug development are conceptually different than evaluating a drug in a clinical trial.

Because these inventions are distinct for the reasons given above and the non-patent literature search required for each group is not coextensive with that for any other group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
